摘要 目的: 观察蛇床子素对人肺鳞癌和肺腺癌的抑制作用。方法: 建立BALB/C裸鼠的人肺腺癌和肺鳞癌模型, 给予蛇床子素, 剂量为 $1.5\mu\text{g}/(\text{g}\cdot\text{d})$, 观察瘤体的大小、重量和动物血清中肺癌标志物DR270的水平, 以此评价蛇床子素的抑癌作用。结果: 蛇床子素对肺鳞癌的抑瘤率为69.5%, 对肺腺癌的抑瘤率为50.0%, 对DR270也有显著降低作用。结论: 蛇床子素对肺鳞癌和肺腺癌的瘤体生长有一定的抑制作用, 尤其是肺鳞癌。

Abstract Purpose: To observed the inhibition effect of osthol on human lung adenocarcinoma and squamacarcinoma. Methods: Set up models of human lung adenocarcinoma and squamacarcinoma on the bodies of BALB/C, one kind of nude mice, then osthol was given to the mice in the dose of $1.5\mu\text{g}/(\text{g}\cdot\text{d})$. Antitumor effect of osthol were valued by weighing the tumor and determing DR 270, the mark of lung cancer in BALB/C serum. Results: The inhibitory rates were 69.5% on lung squamacarcinoma, and 50% on lung adenocarcinoma, respectively also obviously decreased the level of serum DR270. Conclusion: Osthol can inhibite the growing of lung adenocarcinoma and lung squamacarcinoma, especially the squamacarcinoma.
