**中文摘要:**目的:观察平敏冲剂对慢性湿疹患者的疗效及其对血清肿瘤坏死因子2 $\alpha$ (TNF-2 $\alpha$ )、可溶性白细胞介素2受体(sIL-2R)、嗜酸细胞阳离子蛋白(ECP)水平的影响。方法:将71例慢性湿疹患者随机分为平敏冲剂组与西替利嗪组,采用ELISA法检测两组治疗前后血清TNF-2 $\alpha$ ,sIL-2R及ECP水平,并观察疗效。结果:平敏冲剂组有效率86.1%,西替利嗪组有效率54.3%,两组比较差异有统计学意义( $P<0.05$ );且平敏冲剂组复发率8.0%低于西替利嗪组41.4%,两组比较差异有统计学意义( $P<0.05$ )。慢性湿疹患者血清TNF-2 $\alpha$ ,sIL-2R及ECP水平较健康组明显升高( $P<0.01$ ),平敏冲剂组与西替利嗪组比较能显著降低患者血清中的TNF-2 $\alpha$ [(36.93±9.51),(42.83±11.72)ng·L<sup>-1</sup>,( $P<0.05$ )],sIL-2R[(46.42±10.61),(53.34±15.66)μg·L<sup>-1</sup>,( $P<0.05$ )],ECP[(25.81±9.64),(30.16±8.68)μg·L<sup>-1</sup>,( $P<0.05$ )]。结论:平敏冲剂对慢性湿疹具有良好的疗效,调节TNF-2 $\alpha$ ,sIL-2R与ECP的血清水平可能是其作用机制。

**中文关键词:**平敏冲剂 慢性湿疹 可溶性白细胞介素2受体 嗜酸细胞阳离子蛋白 肿瘤坏死因子2 $\alpha$

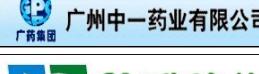

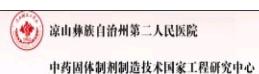

## Effect of Pingmin Granule (PMG) on Chronic Eczema and Its Impact on Serum Levels of TNF-2 $\alpha$ ,sIL-2R and ECP

**Abstract: Objective:** To study effect of Pingmin Granule (PMG) on chronic eczema and its impact on tumor necrosis factor 2 $\alpha$ (TNF-2 $\alpha$ ),soluble inter leukin 2 thereceptor(sIL-2R) and eosinophil cationic protein(ECP) levels. **Method:** The effects of PMG and cetirizine on chronic eczema patients in two groups were observed respectively, and the serum levels of TNF-2 $\alpha$ , sIL-2R and ECP were measured by ELISA before and after treatment. **Result:** In PMG group effective rate was 86.1% vs 54.3%(cetirizine) and recurrence rate was 8.0% vs 44.4% (cetirizine)(all  $P<0.05$ ). Serum levels of TNF-2 $\alpha$ , sIL-2R and ECP in patients were higher than those in normal subjects( $P<0.01$ ), and PMG group could be significantly lower than cetirizine group in the serum of patients with TNF-2 $\alpha$ [(36.93±9.51),(42.83±11.72)ng·L<sup>-1</sup>,( $P<0.05$ )],sIL-2R[(46.42±10.61),(53.34±15.66)μg·L<sup>-1</sup>,( $P<0.05$ )],ECP[(25.81±9.64),(30.16±8.68)μg·L<sup>-1</sup>,( $P<0.05$ )]after treatment. **Conclusion:** PMG has effect on chronic eczema, its regulation on serum levels o f TNF-2 $\alpha$ , sIL-2R and ECP may be the mechanism of action.

**keywords:**Pingmin granule chronic eczema soluble inter leukin 2 thereceptor eosinophil cationic protein tumor necrosis factor 2 $\alpha$
