

## Welcome

Tufts' Biomedical Engineering department brings an interdisciplinary approach to research and education. The BME programs draw from core disciplines such as engineering, biology, computer science, physics, chemistry, and physiology. To promote collaborations and cultural exchange, strong emphasis is placed on interactions with faculty in the School of Arts and Sciences, as well as Tufts' professional schools—including the veterinary, medical, dental, and nutrition schools.

### Announcements:

- [Interested in our Graduate Programs?](#)  
We are now accepting applications for Doctoral, Master of Science, Master of Engineering, or Bioengineering Graduate Certificate programs for fall semester 2010 admission.
