

Introduction to Supply Chain Management
Supply chain management is the management of the flow of goods and services, from the raw materials and services suppliers, through the manufacturing and service processes, to the end customer.

Supply chain management is the management of the flow of goods and services, from the raw materials and services suppliers, through the manufacturing and service processes, to the end customer. This involves the coordination of all activities involved in the production and distribution of goods and services, from the procurement of raw materials to the delivery of finished products to the end customer.
