## **Computing Bounds for the Structured Singular Value via an Interior Point Algorithm**

V. Balakrishnan, E. Feron, S. Boyd, and L. El Ghaoui

Proceedings of the American Control Conference, 4:2195-2196, June 1992.

mu\_ub.pdf

We describe an interior point algorithm for computing the upper bound for the structured singular value described in the paper by Fan, Tits and Doyle, *IEEE Trans AC*, Jan. 1991. We demonstrate the performance of the algorithm on a simple example.
