CSA Illumina

CSA Illumina is designed to provide a simple, more user-friendly approach to searching for novice users while maintaining powerful options for users who require them. The interface provides access to more than 100 databases published by CSA and its publishing partners.

Databases & Collections

CSA Illumina provides access to more than 100 full-text and bibliographic databases published by CSA and its publishing partners.

All Databases

- Arts & Humanities
- Natural Sciences
- Social Sciences
- Technology

COS Funding Opportunities™ Now Available

COS Funding Opportunities™ is now available through CSA Illumina, allowing researchers to secure funding vital to their work. As the world's most comprehensive funding resource, this database provides more than 22,000 records worth over \$33 billion, with opportunities across all disciplines, worldwide.

Deep Indexing Coverage Added to Selected Databases

ProQuest has enhanced subscriptions to selected natural science and technology databases with access to complementary, supplemental Deep Indexing.

These supplemental Deep Indexing databases will be searched along with the traditional A&I file so that users retrieve a more robust, relevant results set.

Deep Indexing captures and categorizes data, variables and other content represented in tables, maps, photographs and other figures which are typically embedded in scholarly publications and previously undiscoverable when searching publications.

Illustrata: Leadership in Deep Indexing

Introducing the most important and innovative indexing advancement in over 30 years, *Illustrata* provides web-based access to indexed tables, figures, maps, graphs, charts and other images contained in scholarly articles. This unique tool provides researchers precision, efficiency, and relevance in the data discovery process. The first database in the family, *Illustrata: Natural Sciences*, includes tables and figures from more than 3,460 journals from prominent publishers resulting in more than 4.7 million indexed images. The recently released *Illustrata: Technology* includes tables and figures from more than 2,720 journals from prominent publishers resulting in more than 4.4 million indexed images.
