摘要 用于研究寡头垄断市场的推测变差方法,可以将各种寡头行为模型进行统一,本文在这个基础上,考察了产量推测和价格推测之间的关系。这种对应关系对于我们理解和指导实践,尤其是战略管理,都有一定的帮助。

Abstract: It is shown that a general integrated model including conjectural variations will range from complete competition to monopoly in a homogeneous market. Then, the relationship between conjectural variations in quantities and conjectural variations in prices in differentiated product market is illustrated. Finally, some theoretical arguments are presented, as well as possible firm's competitive behaviors.
