摘要 近几年来,我国利用外商直接投资(FDI)一直是理论界学者和实际工作者关心和研究的热点问题。现有成果主要关注FDI对经济增长的推动作用,系统研究FDI与技术进步关系的成果相对较少。本文在更加精确测算三次产业技术进步序列的基础上,研究FDI与我国技术进步的相关关系,重点分析FDI对我国三次产业技术进步的影响程度及特点。

关键词: [外商直接投资](#) [技术进步](#) [三次产业](#)

Abstract: The utilization of foreign direct investment (FDI) has been a hot issue for both scholars and managers in recent years. The existing literatures focused mainly on the promotive effect of FDI to economic increasing, but little on the quantitative relation between FDI and technological progress. This paper improves firstly the measurement of technological progress. Then systematically studies the correlation between FDI and technological progress. Finally, based on related statistical data given by the State Statistical Bureau, this paper analyzes the degree and characteristics of FDI's impact on the technological progress in three industries, i.e., primary industry, secondary industry and tertiary industry.
