RESEARCH

This section includes brief summaries of ongoing or recently completed projects within the Department of Health Care Policy (see left sidebar). In general, all projects involve teams of investigators from inside the department and, in some cases, from outside the department and the university. Additional information on completed projects is available from published articles (see [Publications](#)) or from associated websites where indicated.

In addition to clicking on the research categories listed at left, you may use the [Advanced Search](#) function to search for projects by keyword and HCP core faculty member.
