会议背景介绍: Background:

The development of human society has always been associated with a variety of crises which greatly affected and disturbed people's normal life. Public crisis, mainly featured as unexpected, volatile and hazardous, may unfortunately lead to the deviation of the normal development of the society and significantly affect public security and stability. Therefore, governmental authorities have the duty and responsibility in setting up crisis management system and restoring social balance through analyzing, forewarning and resolving the crises. This conference aims to deepen the collaborations and communications among the academic and practical field of public management in both China and abroad, and to offer a platform on which new issues, challenges as well as measures crisis managers confronted with under this more complicated social, economic and political background can be discussed. Through this conference, the study of public management on theories and practices could be improved, the latest research findings of public management would be revealed and the new trend of public crisis management could be identified. Thus the conference will open up the new start for future public crisis management research.
