Initiatives of EU in the New Urbanization Development Through Research and Innovation

Abstract: Research and innovation played a key role in the development of urbanization in the EU. With the development of urbanization, a series of problems including overpopulation, traffic congestion, environmental degradation, and population aging emerged subsequently. Facing challenges from urbanization, the EU has taken initiatives to improve the quality of urbanization through research and innovation, such as, launching the Smart City and Social Innovation Partnership Program, implementing the Smart and Specialization Strategy, developing innovative clusters, etc. This paper studied the innovation policies and measures of EU in urbanization, and proposed suggestions for urbanization development of China, such as, relying on research and innovation to improve the quality of urbanization, strengthening institutional innovation, enhancing China-EU research and innovation cooperation in urbanization.
