### Hui Wei

**Dr Hui Wei** is Director of Economic Analysis and Reporting Branch at the Australian Bureau of Statistics (ABS), responsible for research programs including the measurement of multifactor productivity, the measurement of human capital, business micro data analysis and the ABS publication of Australian Economic Indicators. His research interests include index numbers, capital theory and economic growth. As a governmental economist, he has published numerous research papers with the Australian Bureau of Statistics. He has many years of experience in conducting and managing economic research programs within the environment of an official statistical organization. He is a familiar figure at Australian Conferences of Economists and international conferences related to official economic statistics.

Hui is originally from China, where he held positions of Lecturer at the School of Economics and Management of Tsinghua University, and Assistant Research Fellow at the Institute of Economics of the Chinese Academy of Social Sciences.
