Agric. Econ. – Czech

M. Svatoš

Global consequences of sustainable development of agriculture

Agric. Econ. – Czech, 51 (2005): 20-26

The principal importance and global dimension of sustainable agriculture in frame of a strategy of civilization development is beyond discussion. The actual character of the topic of looking for ways to sustainable development is confirmed by the extensive worldwide program “ Millennium Ecosystem

Assessment” the purpose of which is to map and subsequently monitor the health of the planet Earth. The contribution is focused on various aspects of the non-substitutable role of agriculture regarding sustainable development on the level of developing and developed countries and on the regional and global level.

Keywords:

sustainable development, sustainable agriculture, global ecosystem, multifunctional agriculture, nutrition, quality of life
