我国公共图书馆发展的区域差异分析*

郑京华 (嘉应学院图书馆 广东梅州市514015)

文 摘

根据我国各地区公共图书馆发展不平衡的现状,对31个省市自治区公共图书馆的机构数、总藏量等七项主要统计数据进行了主成分分析和聚类分析。依聚类分析图,把各公共图书馆划分为8个类型区,显示了各类型区的差异性。分析结果可为制定、协调公共图书馆事业发展战略及各馆建设,提供一个量化依据。

Analysis On Regional Differences of the Public Library
Development in China

Zheng Jinghua (Jiaying College Library, Guangdong 514015)

Abstract: According to the present situation of the disequilibrium of the development of the public library in all parts of our county, this paper gives main element analysis and cluster analysis on the seven main statistics (such as the number of the structures, the total number of collection, etc.) of the public libraries of the 31 provinces, municipalities and autonomous regions in our country. On the basis of the cluster analysis chart, this paper classifies the public library in different regions of our country into 8 categories of regions, thus reveals the differences among various categories of regions. The result of these analyses may provide a quantized basis for working out a coordinative developing strategy for our country's public library undertakings.

Keywords: Main element analysis, Cluster analysis, Public library, Regional differences
