Scottsdale, AZ (January 10, 2007) -

The Edison Electric Institute today honored 11 electric utilities for their outstanding efforts to restore electric service or assist other utilities in restoring service following major storms or other natural events during 2006.

The "Emergency Recovery Award" and the "Emergency Assistance Award" are presented annually to U.S. and foreign

based member companies to recognize outstanding efforts in restoring disrupted electric service. Winners were chosen by a panel of judges following a national and international nomination process, and awards were presented during EEI's winter CEO meetings here Wednesday.

Receiving the "Emergency Recovery Award" were Amerson Corporation, Duke Energy, Hydro One Networks, National Grid, NorthWestern Energy and NYSEG, and receiving the "Emergency Assistance Award" were American Electric Power, Entergy, FirstEnergy Corp., Georgia Power and Indianapolis Power & Light.

"When storms interrupt electric service to large groups of customers, our industry has a long and unswerving tradition of restoring power quickly and reaching out to fellow utilities in need of assistance," said EEI President Tom Kahn. "These companies and their employees met that challenge during the past year, working long hours in sometimes dangerous
