- Publishes research integrating subsurface hydrology and geology with supporting disciplines
- Articles explore theoretical and applied aspects of hydrogeologic science
- Official Journal of the International Association of Hydrogeologists
- Executive Editor: Clifford I. Voss, U. S. Geological Survey, Reston, Virginia

Hydrogeology Journal was founded in 1992 to foster understanding of hydrogeology; to describe worldwide progress in hydrogeology; and to provide an accessible forum for scientists, researchers, engineers, and practitioners in developing and industrialized countries.

Since then, the journal has earned a large worldwide readership. Its peer-reviewed research articles integrate subsurface hydrology and geology with supporting disciplines: geochemistry, geophysics, geomorphology, geobiology, surface-water hydrology, tectonics, numerical modeling, economics, and sociology.

Articles explore theoretical and applied aspects of hydrogeologic science, including studies ranging from local areas and short time periods to global problems and geologic time; innovative instrumentation; water-resource and mineral-resource evaluations; overviews of hydrogeologic systems of interest in various regions, and more.
