JOURNAL OF HYDROLOGY AND HYDROMECHANICS is an international open access journal for the basic disciplines of water sciences. The scope of hydrology is limited to biohydrology, catchment hydrology and vadose zone hydrology, primarily of temperate zone. The hydromechanics covers theoretical, experimental and computational hydraulics and fluid mechanics in various fields, two- and multiphase flows, including non-Newtonian flow, and new frontiers in hydraulics. The journal is published quarterly in English. The types of contribution include: research and review articles, short communications and technical notes. The articles have been thoroughly peer reviewed by international specialists and promoted to researchers working in the same field.

Aims and Scope

Why subscribe and read

- > Source of high quality research from Czech Republic and Slovakia, as well as from other parts of the world.
- > Designed to facilitate the exchange of ideas between researchers from different countries.
- > Excellent articles authored by researchers from all over the world

Why submit

- > Relatively fast, fair and constructive peer-review provided by 2 international specialists.
- > Extensive promotion of each published article to the researchers working in the same field.
