## CATENA

### An Interdisciplinary Journal of Soil Science - Hydrology - Geomorphology focusing on Geocology and Landscape Evolution

*Catena* publishes papers describing original field and laboratory investigations and reviews on **geocology** and **landscape evolution** with emphasis on interdisciplinary aspects of **soil science**, **hydrology** and **geomorphology**. It aims to disseminate new knowledge and foster better understanding of the physical environment, of evolutionary sequences that have resulted in past and current landscapes, and of the natural processes that are likely to determine the fate of our terrestrial environment.

Papers within any one of the above topics are welcome provided they are of sufficiently wide interest and relevance.

For more information/suggestions/comments please contact [AuthorSupport@elsevier.com](mailto:AuthorSupport@elsevier.com)

#### Benefits to authors

We also provide many author benefits, such as free PDFs, a liberal copyright

[Guide for Authors](#)[Submit Your Paper](#)[Track Your Paper](#)[Order Journal](#)[View Articles](#)

policy, special discounts on Elsevier publications and much more. Please click here for more information on our [author services](#).

Please see our [Guide for Authors](#) for information on article submission. If you require any further information or help, please visit our support pages: <http://support.elsevier.com>
