

燃料经济
第二章

Fuel Economy MV

2 汽车燃料经济性 Fuel Economy

2.1 汽车燃料经济性评价指标
FE evaluation index

2.2 汽车燃料经济性计算
FE Calculation

2.3 影响汽车燃料经济性因素
Effects of factors on FE

汽车使用经济性

汽车使用经济性是一种使用性能,是指汽车为完成单位运输量所支付最少费用的能力。它是评价汽车运输企业(车队)经营经济效果的综合性指标。

在我国营运汽车的平均运输成本中,汽车运行材料(燃料、润滑油、轮胎、制动液、防冻液、制冷剂)费所占比率最大(>40%)。其燃料消耗和节约的研究,对提高汽车使用经济性具有重要作用。

The auto fuel economy in operation

- The auto fuel economy in operation
- It is a kind of usage function, means auto for completing the ability of the minimal expenses that pay the unit transport quantity. It is comprehensive index that evaluates the auto transport enterprise to conduct the economic gains.
- In the average transport cost of the our country operation auto, the auto circulates the ratio that the material fee(fuel fee, lubricant, the tire fee...etc.) have biggest(40% is above). It consume and economical research, have the important function towards raising the auto fuel economy in operation.
